Incorporated in 1998, Maxim Mechatronics Limited excels in the field of weighing instrumentation & industrial automation and is a complete one stop quality solution provider in the field of weighing instrumentation. In more than two decades of its existence, Maxim has set a benchmark in the industry with its unprecedented commitment to quality and time bound deliveries.

With the vast experience in the field of Weighing and Engineering Automation Solutions, Maxim has the core competence to deliver total Engineering Solutions in Electronic Weighing & Industrial Processes. Maxim managed by hard-core experienced professionals is committed to growth, by developing world class products and solutions that ensure value addition to our clients.

Outdated methodologies have to be replaced by newer methods, technologies and tools. Automation projects have become too huge and cannot be churned out from garages. The future of the entire industry depends on the successful transformation of Mechatronics from a cottage industry to an Engineering discipline as a whole.

We expect our growth to continue at an appreciable pace in the foreseeable future. Maxim plans to make significant future contributions in the field of industrial automation by providing solutions through the latest software technologies. Our customers and business associates understand Maxim a name that spells Quality, Value and Commitment.

Services:

- Annual Maintenance Contracts
- Calibration of Weighing Instruments
- Installation & Commissioning Services
- Erection of Foundation & allied civil works
- Facilitation of Stamping & Verification by department of Legal Metrology

Software:

- Automated Milk Collection Software
- Un-maned Road Weighbridge Software
- Customized Weighing Automation Software
